

TOSS SYSTEM

GLOBAL LOGISTICS IT SOLUTION

TOTAL ONE-STOP SHIPPING

ABOUT TOSS SYSTEM

User-Centered Optimization System

Your logistics will become stronger.

Toss System is a solution that can conveniently handle all logistics activities on the Supply Chain at home and abroad, including import of raw materials, domestic transportation, storage, shipping, sea, air, and overseas inland transportation.

We has implemented a customizing process to construct a logistics system suitable for the corporate environment and develop TFT according to the user's needs.

Through this, we provide systems optimized for each business environment, contributing to the improvement of work efficiency and the enhancement of logistics competitiveness.

P/O Module

Make your ship planning

- Purchase Order Management Tool
- Request shipping and automate PO creation
- Shipment Management by per PO
- Easily set-up the shipping plan

01 | P/O List

- Order Management
- Advanced Searching /Report
- P/O register

02 | P/O Detail

- P/O Document / Transport
- Booking Request
- Shipping Detail / Balance Check

Shipping Module

Make your planning easy

- Abundant in experience and know-how
- Support operation and high-productivity
- Visual Tracking interface
- Item checking by per container, shipping schedule

01 | Shipping List

- Real Time Monitoring
- Shipping Summaries

02 | Shipping Profile

- Vessel / Container Profile
- Conditions[size,type,weight]
- Document : C/I, P/L, C/O, Bill, etc

Document Module

Document management

- Automated Documentation : P/O, S/R, C/I, P/L
- Document Management and Customizing Menu Option
- ex) Export/Import Permit, Other documents

01 | Document Mgmt

- Document Up-Down load
- Requesting inland trucking
- Document Mgmt Interface

02 | Documentation

- Check B/L, Packing List, Commercial Invoice, Purchase Order

Container Module

Container Movement Planning

- Planning Container Management by input detail of container stuffing
- Integrated Container Management by per Item, Yard, Demurrage, Detention and etc.

01 | Management

- Demurrage/Detention Due Date Check
- Movement Planning
- Automatic Charge Count

02 | Item Loading

- Container Profile
- Item Loading Interface

Item Module

Item/Price management

- Improve the document (CI, PL) efficiency by managing item, price and DB maintenance
- Create report in order to do decision making like export status, and price policy

01 | Item Basic Data

- Item Category Management
- Price control
- Statistics Analysis
- Converting to Excel File

02 | Reporting

- Multi-Dimensional Report
- TEU, ITEM, LINE, PRICE, etc

STORY OF TOSS SYSTEM

Korea's First Customized Logistics System

Find out of the customer's inconvenience

Toss system development was first started with the idea of addressing any inconvenience that may arise from customer's work.

While working as a professional forwarding company, Total World Sea & Air has attempted to contact IT technology to solve various problems such as reducing inquiries from customers' logistics managers, delivering progress documents, transportation, and cooperation with customs agents, which has been the beginning of the development of current total logistics solutions and has been a development ideology.

After acquiring and merging e-Logistics, an Internet import and export logistics company, in November 2002, we began research and development of logistics IT system solutions in earnest, and based on our 18 years of know-how, the current Toss System module has been completed.

LOGISTICS VISIBILITY

Implement intuitive VISIBILITY

You can see all logistics at a glance.

Toss System is a software that compiles all the logistics knowledge of Total World Sea & Air, a professional forwarder company.

Therefore, all logistics processes are designed to be linked from the initial development to implement the logistics visibility that customers want the most, and the progress of each step is confirmed through an intuitive interface.

So, from cargo ready to customer delivery, you can now manage your entire Supply Chain on one screen.

COMMUNICATION

Excellent Work Productivity
We'll keep your time.

일Aren't you wasting your valuable time on answering too many phone calls, checking your email, or sending a fax during your day?

TToss System is a web-based system that enables all business people to connect to one interface at the same time, regardless of location and time, and allows them to share various documents uploaded to the server, making your working hours more useful.

Productivity Target	Before	After
Number of requests per case	10	1~2
Communication Satisfaction	70/100	95/100
Time to check schedule	1Hour	5Min.
B/L checkout time	1Hour	5Min.
Business Error Delay Rate	2 %	0.1 %

AUTO ALARM

Thorough Logistics Task Management Immediately inform your logistics task.

For logistics workers, identifying and prioritizing what needs to be done during the day is another inconvenience.

In addition, sudden staff absence or changes can make it difficult to understand what needs to be done right away, which can result in your loss of logistics costs.

However, if you use the business alarm provided by the TOSS system, the inconvenience will now be eliminated.

This is because we are automatically updating the priorities of your most important tasks in real time and showing them to you in LIST.

CONTROL TOWER

Powerful CY management

Your storage fee will be reduced.

If the imported cargo is currently stored at the CY dockyard, do you have a logistics partner that can immediately check which terminal has how many containers right now, how many days of FREE TIME are left, and which container is any cargo in?

TOSS system provides real-time information on all CY where your cargo is stored. Because of this, you will have a special experience of using CY as a single logistics automation warehouse because additional storage fees are prevented due to missed shipments and the planned container import and exit management is possible considering FREE TIME.

All logistics information is integrated and managed by the system, so it's very easy and quick to check which container your order is in.

CROSS TRADE

Management Tools Optimized for Trilateral Trade

Your overseas business competitiveness will increase.

It is very difficult to directly manage import and export logistics such as shipping, customs, and transportation in third countries. In addition, if the location of cargo is not properly identified, related documents are checked, and due date management are not carried out properly, the inefficient logistics structure will continue, causing disruptions in overseas production or loss of trust from customers.

To address these customers' concerns, Total World Sea & Air has improved TOSS system's function to optimize trade between the three countries. In particular, Toss system is used to carry out logistics between the large domestic clothing brands B and the medical device H, and the headquarters in Korea is monitoring all of the progress.

PRICE POLICY

Unconventional Pricing Policy

Your logistics are our top priority.

ERP development through IT developers can cost at least \$20,000, but low logistics expertise often results in poor or impractical system effects.

Therefore, TOSS system, created by Total World Shipping and Aviation with expertise in logistics forwarding, is faithful to your logistics ERP system and has specialized functions for practical use.

With this superior functionality, the biggest competitive advantage of TOSS SYSTEM is that there is no burden on your biggest concern, the cost.
